@SouthCoastAQMD    

FOR IMMEDIATE RELEASE: November 2, 2019

UPDATED: South Coast AQMD Continues Smoke Advisory Due to Martinez Fire in City of Thermal

Valid: Sat., November 2, through Sun., November 3, 2019

This advisory is in effect through Sunday morning. South Coast AQMD will issue an update if additional information becomes available.

A large debris fire called the Martinez Fire is burning near the intersection of Avenue 66 and Martinez Road in the city of Thermal in the Coachella Valley. The burn area is approximately 52 acres with 100% containment. The fire is 85% controlled as of Saturday, meaning that 85% of the burning material has been extinguished. Information on the fire can be found at <https://inciweb.nwcg.gov/incident/6651/>.

Smoke from the fire has been impacting Thermal, La Quinta, and Mecca, as well as communities near the Salton Sea. The South Coast AQMD has deployed two temporary PM2.5 monitors west of the fire in Thermal and east of the fire in Mecca. Visit

<https://xappprod.aqmd.gov/SMSDataSite/Home/AdminIndex?MonitoringSiteId=13> to view current readings from the South Coast AQMD's monitor in Thermal and

<https://xappprod.aqmd.gov/SMSDataSite/Home/AdminIndex?MonitoringSiteId=14> to view current readings from the South Coast AQMD's monitor in Mecca.

Forecasted Smoke Impacts

- On Saturday winds are predicted to be light with wind directions from the southeast. This will push any smoke generated by the fire to northwest towards Thermal and La Quinta.
- On Saturday evening and Sunday morning, winds are expected to come from the north, pushing smoke to the south towards the Salton Sea.
- If the fire continues to generate smoke, impacts are expected to continue throughout the Coachella Valley.

Overall, meteorological conditions may bring smoke and ash into portions of the Coachella Valley. Air quality may reach **Unhealthy for Sensitive Groups** or higher in areas directly impacted by smoke.

In any area impacted by smoke: If you smell smoke or see ash due to a wildfire, limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter, and avoiding vigorous physical activity. For more tips on protecting yourself during a wildfire, see South Coast AQMD's Wildfire Smoke & Ash Health & Safety Tips page: <http://www.aqmd.gov/wildfire-health-info-smoke-tips>.

Riverside County: Coachella Valley (Area 30)

Previous Smoke Impacts

At the monitor in Thermal, since Friday afternoon, 24-hour average PM_{2.5} concentrations have been between 6.2 and 8.9 micrograms per cubic meter (ug/m³). The highest hourly concentrations occurred on Saturday morning at 9:00 am, with a peak hourly concentration of 34 ug/m³. Peak air quality index values, calculated with the NOWCAST method, were in the **Good to Moderate** category.

At the monitor in Mecca, since Friday afternoon, 24-hour average PM_{2.5} concentrations have been between 13.8 and 16.8ug/m³. The highest hourly concentrations occurred on Saturday morning at 7 am, with a peak hourly concentration of 62 ug/m³. Saturday morning, air quality index values calculated by the NOWCAST method were in the **Unhealthy for Sensitive Groups** category. Since then, air quality index values have been in the **Good to Moderate** categories.
