South Coast AQMD Continues Smoke Advisory Due to Lake Fire Northeast of Castaic

Valid: Saturday, August 15 through Sunday, August 16, 2020

This advisory is in effect through Sunday afternoon. South Coast AQMD will issue an update if additional information becomes available.

A wildfire named the Lake Fire is burning northeast of Castaic in Los Angeles County, within the Angeles National Forest. As of 9:00 AM on Saturday, the burn area was 14,714 acres with 12% containment. Current information on the Lake Fire can be found on the Incident Information System (InciWeb) at <https://inciweb.nwcg.gov/incident/6953/>.

Past and Current Smoke Impacts

The Lake Fire is producing heavy smoke on Saturday afternoon based on satellite imagery, webcam imagery and social media posts. Intense fire activity is currently generating large vertical smoke plumes, which are mainly concentrated to higher altitudes and moving to the north on Saturday afternoon out of South Coast AQMD's jurisdiction. PM_{2.5} concentrations at South Coast AQMD's monitors in Santa Clarita and North Hollywood as well as low-cost sensors also in Santa Clarita and the East San Fernando Valley have been within the **Good to Moderate** Air Quality Index (AQI) index levels since Friday evening. PM_{2.5} concentrations at South Coast AQMD's Reseda monitor and low-cost sensors in the West San Gabriel Valley have been within the **Good to Moderate** AQI index levels since Friday evening. Visit <https://www.aqmd.gov/aqdata> to view current air quality conditions.

Forecasted Smoke Impacts

- On Saturday afternoon, winds near the Lake Fire are predicted to be from the west and will push smoke to the east out of South Coast AQMD's jurisdiction.
- On Saturday evening through Sunday morning, winds will shift to come from the northwest. During this time, it is possible that some smoke may be transported down from the higher

elevations to areas southeast of the fire including Santa Clarita and the Angeles National Forest. Elevated ground level concentrations of PM2.5 are expected overnight as the smoke is likely to remain closer to the ground.

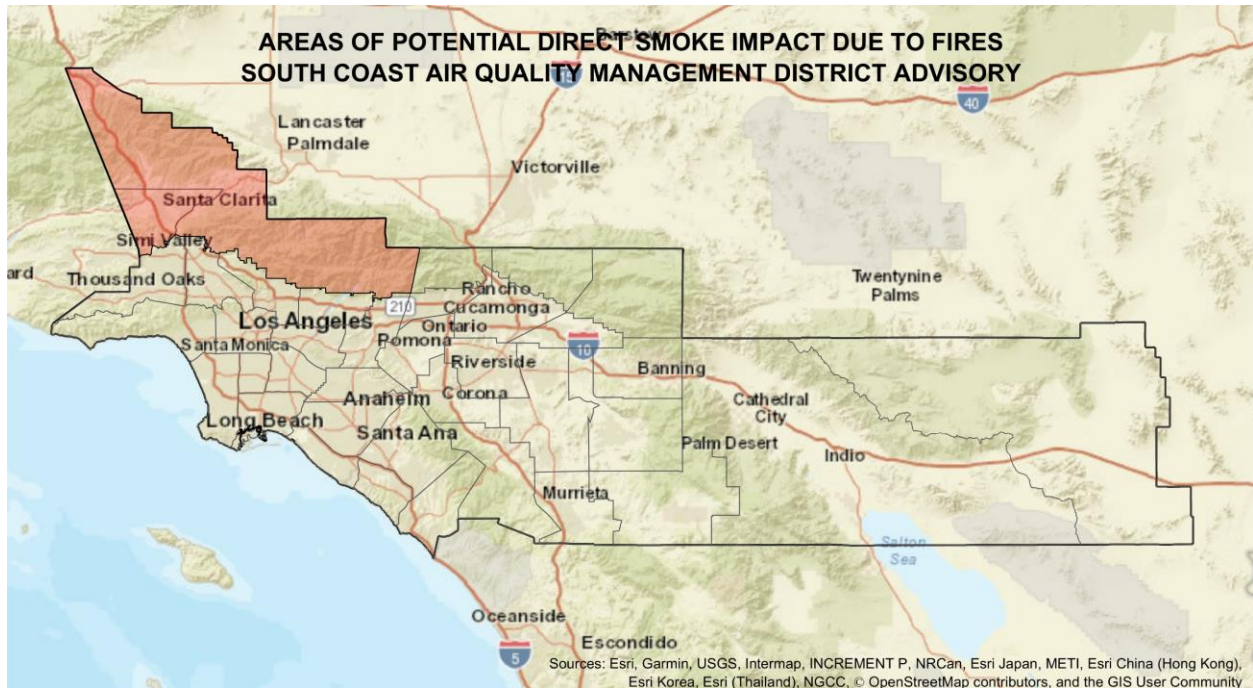

- On Sunday afternoon, winds near the fire will shift to come from the south and southwest and blow any smoke to the north and northeast out of South Coast AQMD's jurisdiction.

Overall, meteorological conditions may bring smoke and ash into portions of the San Gabriel Mountains and Santa Clarita Valley. **Unhealthy for Sensitive Groups** or higher AQI levels due to PM2.5 concentrations are possible in areas of direct smoke impacts. Ozone levels not associated with the fire are expected to reach **Unhealthy or Very Unhealthy** AQI levels on Sunday.

In any area impacted by smoke: If you smell smoke or see ash due to a wildfire, limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter, and avoiding vigorous physical activity. For more tips on protecting yourself during a wildfire, see South Coast AQMD's Wildfire Smoke & Ash Health & Safety Tips page: <http://www.aqmd.gov/wildfire-health-info-smoke-tips>.

Areas of direct impacts and poor air quality may include portions of:

- **Los Angeles County:** Santa Clarita Valley (Area 13), San Gabriel Mountains (Area 15)
