South Coast AQMD Issues Windblown Dust Advisory for Portions of Riverside County

Valid Wednesday 9:00 p.m. until Thursday 12:00 p.m.

Valid Wednesday 9:00 PM until Thursday 12:00 PM

To view current air quality in your neighborhood, download the [South Coast AQMD app](#) or visit www.aqmd.gov/AQImap.

Forecasted Air Quality Impacts

- Periods of elevated particle pollution (PM10) levels in the Coachella Valley, the San Geronio Pass area, and Eastern Riverside County are expected overnight on Wednesday until mid-day on Thursday
- Blowing dust may result in Air Quality Index (AQI) levels that are **Unhealthy for Sensitive Groups** or worse at times

- High PM10 levels in the region are a result of gusty winds, which can lift dust and soil into the air
- Air quality can vary by hour and location depending on wind conditions
- As of Wednesday morning, the National Weather Service (NWS) has posted Wind Advisories and High Wind Warnings across the area. Visit NWS San Diego's website <https://www.weather.gov/sgx/> for more information.

If you are in an area impacted by windblown dust or ash:

- Limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter.
- Avoid vigorous physical activity.
- Run your air conditioning and/or an air purifier. If possible, do not use swamp coolers or whole house fans that bring in outside air.
- Help minimize dust pollution by stabilizing loose soils and slowing down if driving on dirt roads.

For more information, see the [EPA Guide for Particle Pollution](#) (PDF).

South Coast AQMD is the regulatory agency responsible for improving air quality for large areas of Los Angeles, Orange, Riverside and San Bernardino counties, including the Coachella Valley. For news, air quality alerts, event updates and more, please visit us at www.aqmd.gov, download our award-winning app, or follow us on [Facebook](#), [X](#) (formerly known as Twitter) and [Instagram](#).
